

ASIL ZAIN T A

Frontend / Full Stack Developer

+91 7871247661 @ asilzai02@gmail.com https://asilzain02.github.io/My-Portfolio/

SUMMARY

I am a passionate and innovative web and software developer with extensive hands-on experience in building responsive, interactive, and AI-powered applications. Skilled in modern web technologies, mobile app development, and full-stack solutions, I excel at transforming complex ideas into user-friendly, high-performance digital experiences. I have a strong aptitude for problem-solving and a keen eye for design, ensuring that every project I deliver strikes the perfect balance between creativity and functionality. Always eager to explore emerging technologies, I thrive in collaborative environments where I can contribute to meaningful projects that make an impact.

EDUCATION

HSC

Adarsh Higher Secondary Matriculation School

04/2020 - 04/2022

Master of Technology in Software Engineering (Integrated)

VIT University

04/2020 - 04/2027

SKILLS

C/C++	CSS	Figma	Flutter	Git	GitHub	HTML	Java	JavaScript	ML Algorithms	NLP	OpenCV
Python	React	scikit-learn	Tailwind	TypeScript	Visual Studio Code	Express.js					

PROJECTS

Astro Edge AI

01/2023 - 02/2023

Astro Edge AI

- Developed an AI-powered system for real-time astronomical data analysis and edge computing applications
- Achieved accurate predictions and insights for astronomical datasets

Spam Email Detection

02/2023 - 03/2023

Spam Email Detection

- Built a machine learning model to classify emails as spam or not spam using NLP techniques
- Enhanced email security by achieving high detection accuracy

Text Summarization System

03/2023 - 04/2023

Text Summarization System

- Created an AI-based tool to summarize large text documents efficiently
- Reduced reading time while preserving key content and context

Face Recognition System

04/2023 - 05/2023

Face Recognition System

- Implemented a real-time facial recognition system for security and authentication purposes
- Enabled accurate and fast identification for multiple individuals

PROJECTS

Hand Gesture Recognition System

📅 05/2023 - 06/2023

Hand Gesture Recognition System

- Developed a system to detect and interpret hand gestures for human-computer interaction
 - Applications include gesture-based controls for devices and presentations
-

AI-Based WiFi Naming Trap Detector

📅 06/2023 - 07/2023

AI-Based WiFi Naming Trap Detector

- Built an AI system to detect fake or malicious WiFi networks to prevent cybersecurity threats
 - Improved network security awareness and protection from phishing attacks
-

KEY ACHIEVEMENTS

Deployment of AI-Integrated Solutions

Successfully deployed multiple full-stack and IoT projects, including AI-integrated solutions

Interactive Online Portfolio

Built and maintained an interactive online portfolio to showcase professional projects

INTERESTS

Interest in AI & Web Development

Strong interest in AI, ML and web development
